Profile

Full-stack web developer with over 7 years of experience building robust web applications, content platforms, and **e-commerce solutions**. Specialized in **PHP, Laravel, Angular, Vue.js**, and **Shopify (Liquid & Custom Apps)**, with recent expertise in **Directus 10, Go (Golang)**, and **AI integrations**. Experienced in remote work environments, collaborating with international teams across Spain, Mexico, Colombia, and Guatemala. Passionate about creating scalable, user-centric solutions and continuously adopting modern technologies to solve complex business challenges.

Hard Skills

Soft Skills

Experience

Mudanzas Francesc Macia / Freelance Web Developer

JANUARY 2026 - PRESENT, REMOTE (Spain)

- Sole full-stack developer responsible for building and maintaining a complete moving company platform based on **Directus 10** CMS.
- Built advanced budget estimation extensions that calculate moving costs based on distance, number of items, and package volume.
- Built a public client-facing quote form ("moving budget calculator") that loads its structure dynamically from the backend and stores submissions in Directus, capturing leads end-to-end.
- Developed the modules that cover the full moving process: scheduling calendar with blocked days, photo inventories, payroll, distribution routes, permission management and automated PDF reports.
- Designed and implemented an **AI-powered form assistant** using **Gemini 3.6 Flash** for object recognition. Users upload photos of spaces, the AI detects and classifies items (e.g., "1 table, 4 chairs"), and auto-populates the form for streamlined processing – currently in production.
- Developed custom Directus 10 endpoints and workflows to handle image processing, AI integration, and complex business logic.

Overlap / Freelance Web Developer

DECEMBER 2024 - DECEMBER 2025, REMOTE (Spain)

- Worked as an external team member developing **Origami XP**, an internal corporate content management portal for employee training and resources.
- Implemented **Single Sign-On (SSO)** authentication system to streamline secure access across the platform.
- Designed and built a new custom template architecture from scratch, introducing reusable Angular components for diverse content types.
- Developed a **real-time notification system** and an **events calendar** to improve internal communication and task tracking.
- Integrated the platform with external educational tools by building custom integration components for **Moodle LMS**, enabling seamless course synchronization and user progress tracking.

bchange (bchange.ai) / Freelance Web Developer

DECEMBER 2023 - SEPTEMBER 2024, REMOTE (Spain)

- Maintained and enhanced a Mindset Management training platform built on WordPress, with custom Vue.js components embedded for interactive learning experiences.
- Developed custom **WordPress plugins** that exposed RESTful endpoints for Vue.js frontend components, enabling dynamic data consumption and real-time updates.

- Built AI-powered evaluation components using **ChatGPT models** to assess participant responses after video-based course modules, providing automated feedback and scoring.
- Led performance optimization efforts, improving page load times and addressing scalability challenges inherent to the complex WordPress architecture.
- Implemented UI/UX enhancements and visual rebranding across the platform to improve user engagement.

Gradiweb SAS / Web Developer

AUGUST 2021 - OCTOBER 2022, REMOTE (Colombia)

- Custom-designed, built, and optimized high-converting **Shopify stores** utilizing **Liquid** templating language, HTML5, CSS3/SASS, and JavaScript.
- Engineered **custom Shopify applications** to extend core store functionality, automate business logic, and integrate external third-party services.
- Built and consumed custom RESTful and GraphQL APIs for Shopify integrations, ensuring seamless data synchronization between e-commerce stores and backend services.
- Customized Shopify themes, sections, and snippets to enhance overall UI/UX and tailor shopping workflows according to client requirements.

DGVIT Inc / Web Developer

AUGUST 2019 - AUGUST 2021, REMOTE (Guatemala)

- Developed and maintained WordPress websites for real estate agencies, ensuring responsive design and performance optimization.
- Maintained and evolved **Obrien CRM v2**, a full-featured customer relationship system using **PHP CodeIgniter** for the backend API and **Vue.js** for the frontend.
- Began development of **Citymax Operation Center v2**, a new operational management platform built with **Laravel** (backend API) and **Vue.js** (frontend).

SystemSym.com.mx / Web Developer

SEPTEMBER 2018 - MAY 2019, REMOTE (Mexico)

- Performed bug fixes and feature enhancements on a billing system integrated with Mexico's **SAT electronic invoicing (CFDI)** system.
- Integrated multiple payment gateways (**PayPal**, **PayU**) into the billing system.
- Developed a **CFDI API** to extend billing system capabilities.
- Built a custom **Coach Football API** for a client-specific project within SystemSym.

Education

Universidad Alonso de Ojeda / Computer Engineer
